JEL classification numbers should be included after the key words.
2. The paper starts on the second page, with all pages (excluding the abstract page) numbered consecutively at the bottom. References, appendices, tables and figures follow in respective order.

5. Acknowledgements if any, should be collated in a separate section at the end of the article.
6. Responsibilities for the accuracy of bibliographic citations lies entirely with the authors. All references should be identified at the appropriate point in the text by inserting, within parentheses the last name of author and year of publication e.g. [Author 2003]. Add page numbers when ideas are used or words are quoted e.g. [Author 2003: 204-205]. If there are more than two authors, the first name should be cited followed by '*et al.*' For multiple citations of publications by the same author in the same year, append a letter after the date to distinguish different citations e.g. [Chong 2003a].
7. List all items cited by authors in alphabetical order in a separate sheet entitled References. Do not number the references. When possible, the reference section uses full author names. Names of first authors are represented as Last, First Middle Initial, and subsequent author names as First Middle Initial Last with an "and" preceding the last author. See the following examples.

9. All illustrations should be provided as high quality printouts, suitable for reproduction. They should be numbered consecutively in Arabic numerals in the order in which they are referred to in the text. They should accompany the manuscript, but should not be included within the text. Please mark all illustrations on the back with the figure number. Mark the appropriate position of a figure in the manuscript.
