INSTRUCTIONS FOR AUTHORS

1. The cover page should contain the title of the manuscript, the author(s) and their affiliations. It must also provide complete correspondence information – postal address, telephone, fax numbers and email addresses. The title should be typewritten in bold and in 14pt fonts. Author's name, affiliation and correspondence information should be typewritten in single spacing using 10pt fonts with affiliations typed in *italics*. All text on this page should be centre aligned. Contact of corresponding author and acknowledgement should be mentioned in the footnote with a symbol *.
2. Manuscripts may be written in either Bahasa Melayu or English. Only original and unpublished works will be considered. The first page of text shows the title of the manuscript with an abstract of about 100-150 words and a maximum of 6 keywords identifying the main topics of the manuscript. JEL classification numbers should be included after the keywords. Abstract, keywords and JEL classification should use 12pt fonts.
3. The paper starts after the JEL classification, with all pages numbered consecutively at the bottom right. Main title of the article should be typewritten in bold and using 14pt fonts. The manuscript should be typewritten single spaced with 12pt fonts. Heading of main section (e.g. Introduction) and headings of subsections should be typed in bold. Headings of subsequent subsections should be typed in *italics*.
4. Tables and figures should be embedded in the text. All tables and figures should be numbered consecutively with Arabic numerals, have a brief title, and be referred to in the text. The entire table should be presented in one page unless too long. Vertical lines should not be used in table. Explanatory notes should be placed at the bottom of the table. The word 'Notes' precedes the table notes and has to be set in *italics*. Tables and their respective titles should be aligned to the left. All figures should be provided as high quality printouts, suitable for reproduction. Figures and their respective titles should be aligned to the centre.
5. Responsibilities for the accuracy of bibliographic citations lie entirely with the authors. All references should be identified at the appropriate point in the text by inserting, within parentheses the last name of author and year of publication e.g. (Author 2003). Add page numbers when ideas are used or words are quoted e.g. (Author 2003: 204-205). If there are more than two authors, the first name should be cited followed by '*et al.*'. For multiple citations of publications by the same author in the same year append a letter after the date to distinguish different citations e.g. (Chong 2003a).
6. List all items cited by authors in alphabetical order in a separate sheet entitled References. References and appendices follow in respective order. Do not number the references. Names of first authors are represented as Last, First Middle Initial. and subsequent author names as First Middle Initial Last. with an "and" preceding the last author. See the following examples:
